Reflection Questions

1. What advantages do IoT enabled devices provide for home security?

Ans: They are very helpful in our daily activities, sensing, and alerting. They save lives of many people, for example fire sensor, theft sensor, and etc.

2. What is the advantage of using a registration server for IoT enabled devices?

Ans: I think now a days using IOT makes everything easy for example we can control or monitor the entire security system at once from one dashboard.

3. Search the internet to find what types of IoT enabled devices are used for home security?

Ans:

Let me start from the four IOT we discussed in this exercise, smart cameras, smoke sensor , motion sensor, smart doorbells, light sensor, and etc.
