Part1step2c .What are the source and destination MAC and IP addresses for the frame and packet?

Ans: DEST ADDR:00E0.8FA9.B373 and SRC ADDR:0060.70EC.83C3

Why is the destination MAC address the broadcast address?

Ans : I think the sales 2 know the ip but it doesn't understood the mac address

Enter the **ipconfig /renew** command. This will force the host to request a new IP address from the DHCP server that is running on the **Edge** router. You should see confirmation of new IP addressing.

What IPv4 network is assigned to the **Finance** network?

What IPv4 network is assigned to the **Sales** network?

ANS: finance network was 192.168.2.0

Sales networks was 192.168.1.0

What is the benefit of using multiple IPv4 networks, or subnetworks, within an enterprise?

Ans: they use for securing the devices and to upgrade its performance Aswell.
